Single-Source Network Cabling Technology Solutions

## The Telecom Designs Advantage...

Telecom Designs has been serving Fortune® 1000 clients nationwide as a single-source supplier of network cabling and technology services for over 20 years.

Our core business includes technology rollouts, design and installation of structured cabling networks, communications systems and project management. These services include a robust client web interface, system maintenance and repair around the clock, 365 days a year.

We serve single and multiple location companies nationwide, including retail, health care and financial industries. Our superior customer service and project success is why we are a leader in network cabling and technology services.

### Nationwide Technology Rollouts

Telecom Designs has a long-standing reputation in successful cabling and technology rollout projects for thousands of locations nationwide.

Our rollout services include Site Surveys, Cabling Installations, Equipment Installations, Electrical Requirements and Equipment Staging.

Our project team works with you to determine the exact goals and objectives of the project. We develop a Telecom Designs JobPack project plan, which includes documentation covering the design and implementation, as well as the testing and data acquisition required for the project.

**Telecom Designs offers innovation, expertise and superior service in technology deployments.**

### New & Remodel Store Installations

Telecom Designs has conducted thousands of successful new store and remodel technology projects and our commitment to meeting your business needs is our highest priority. As your cabling and technology vendor, we maintain consistent contact with all management involved with the construction process.

A Project Manager is assigned to your job to ensure your project goals and timelines are met. According to our customers, effective communications is key to successful new store and remodel installations.

Telecom Designs has a complete understanding of the challenges brought on by new store construction, dial tone entry, and remodeling existing stores as they relate to any low voltage cabling requirements. With over twenty years in business, we are the experts.

## Structured Cabling Services

Whether you have one location or thousands of sites, Telecom Designs is your complete one-stop cabling solution.

We have a vast amount of experience installing a wide range of structured cabling solutions to meet your needs on a nationwide basis. Our installations include cabling infrastructure and design of wired, wireless, paging, voice, data and security applications for large, multi-location companies as well as single sites.

Our services include cabling design and infrastructure installations, such as:

- Category 5, 6 & 7 Voice/Data Cabling
- Fiber Optic Cabling
- Voice & Data Racks
- Coax Cabling
- Music & Paging System Cabling
- CCTV Cabling
- High Voltage Electrical Cabling
- Device Specific Cabling

We have the experience to design and build cabling infrastructures to meet your needs, whether it's one location or thousands of sites. Our cabling services include Tone & Tag Surveys, Wire Mapping and Cable Certification.

**Telecom Designs  
understands the importance  
of effective communications and  
project management in your  
network cabling and  
technology installations.**

## Project Management

Project management is one of the most important aspects of any technology deployment and Telecom Designs offers both on-site and online project management options that fit your business needs.

New stores, remodel stores and rollout projects require superior project management methods throughout the development, design and installation of all network cabling and technology projects. Telecom Designs' expert project managers are focused on meeting your business requirements. Our project management services not only include a dedicated Project Manager assigned to your job, but we also offer online project management tools to optimize your project development and communications.

Our customers enjoy the added benefit of the Telecom Designs Web Portal where key contacts may communicate throughout the project's deployment. Through our secure web server, all documentation and work orders are accessible to the project management team. Your online project management functionality can be designed for your documentation, work order processing and reporting requirements.

Our Project Management Services include:

- Defining Project Goals
- Project Planning
- Project Implementation
- Communications and Reporting
- Project Review
- Online Project Management Tools

Our superior project management standards have been developed over the last 20 years of refining processes based on our customers' needs.

## Paging Systems Installation

As experts at overhead paging systems, Telecom Designs has designed, installed and currently maintains thousands of paging systems nationwide.

Telecom Designs' experience in overhead paging system installations has positioned us as a premier provider of this service to our growing customer market. Our customers find our paging amplifiers and speakers to be the most reliable in the industry, and they are backed by expert installations and our superior service.

Designing and servicing paging systems is one of our strongest capabilities. We are experienced sound contractors and have technicians who have been engineering and installing paging systems for well over 25 years.

We design and build all sizes of paging systems, from the local retail store, to the million sq. ft. backstage warehouse.

Whether you use our recommended products, or specify one of your own, you can be assured that Telecom Designs has the knowledge and experience to install and service your paging systems.

**When it comes to service and technology installations, Telecom Designs strives to exceed customer expectations.**

## Service & Repair

Telecom Designs provides nationwide service and repair 24 hours a day/7 days a week, for all your low voltage structured cabling and related network systems.

We provide service and repair during normal business hours, after hours and weekends, in addition to emergency service response through our Service Call Center. When you partner with Telecom Designs for your cabling and technology systems, you can rest assured you are receiving the best service in the industry.

We provide service on a wide variety of telephone and data systems and all the related peripheral products that are used to support the environment. These systems include:

- Tier 1 & Tier 2 level help desk support
- Telephone Systems
- Dial Tone Related Problems
- T-1 & Data Circuits
- Paging Systems
- Music Systems/Media Servers
- Indyme Call Boxes
- POS Equipment
- Servers & Computer Room Equipment
- Cabling Issues
- Networked PC's
- In Store Kiosks
- ATM Machines
- Back Up Computer Modems
- Veriphones
- Lottery Devices
- Specialty Devices Utilized in Retail Stores

Telecom Designs provides qualified service technicians from our Service Call Center on a nationwide basis to resolve service issues around the clock, guaranteed. If your problem cannot be resolved through our Service Call Center, a technician will be dispatched to your site.

Our focus is saving your company time and money with all service and repair issues.
